

Distrupted Comet is a Train of Fragments

(Not to scale!)

Distrupted Comet's Sun Orbit is inclined to ecliptic

Orbit precession is effected by Jupiter

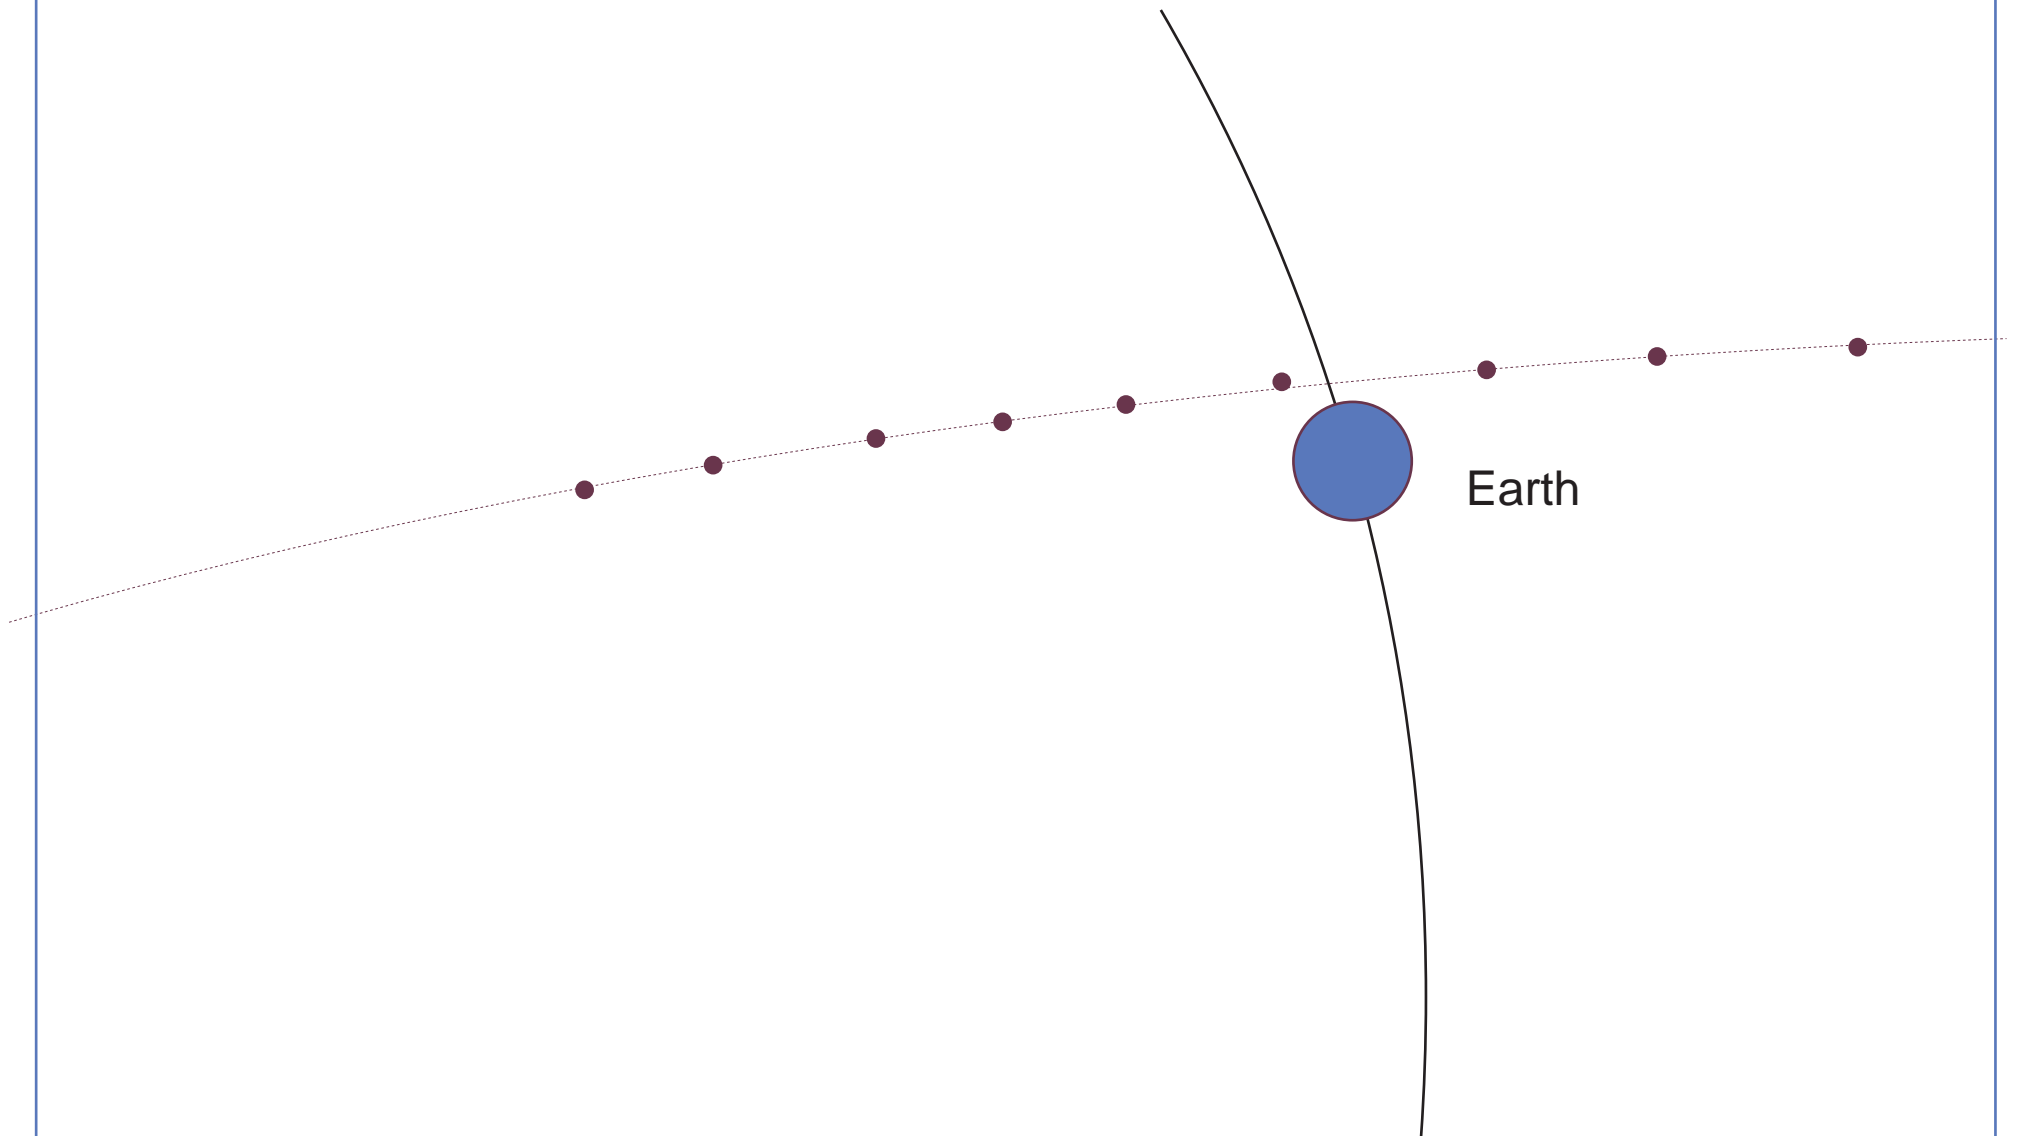

From 475 AD to 1010 AD, planes intersect

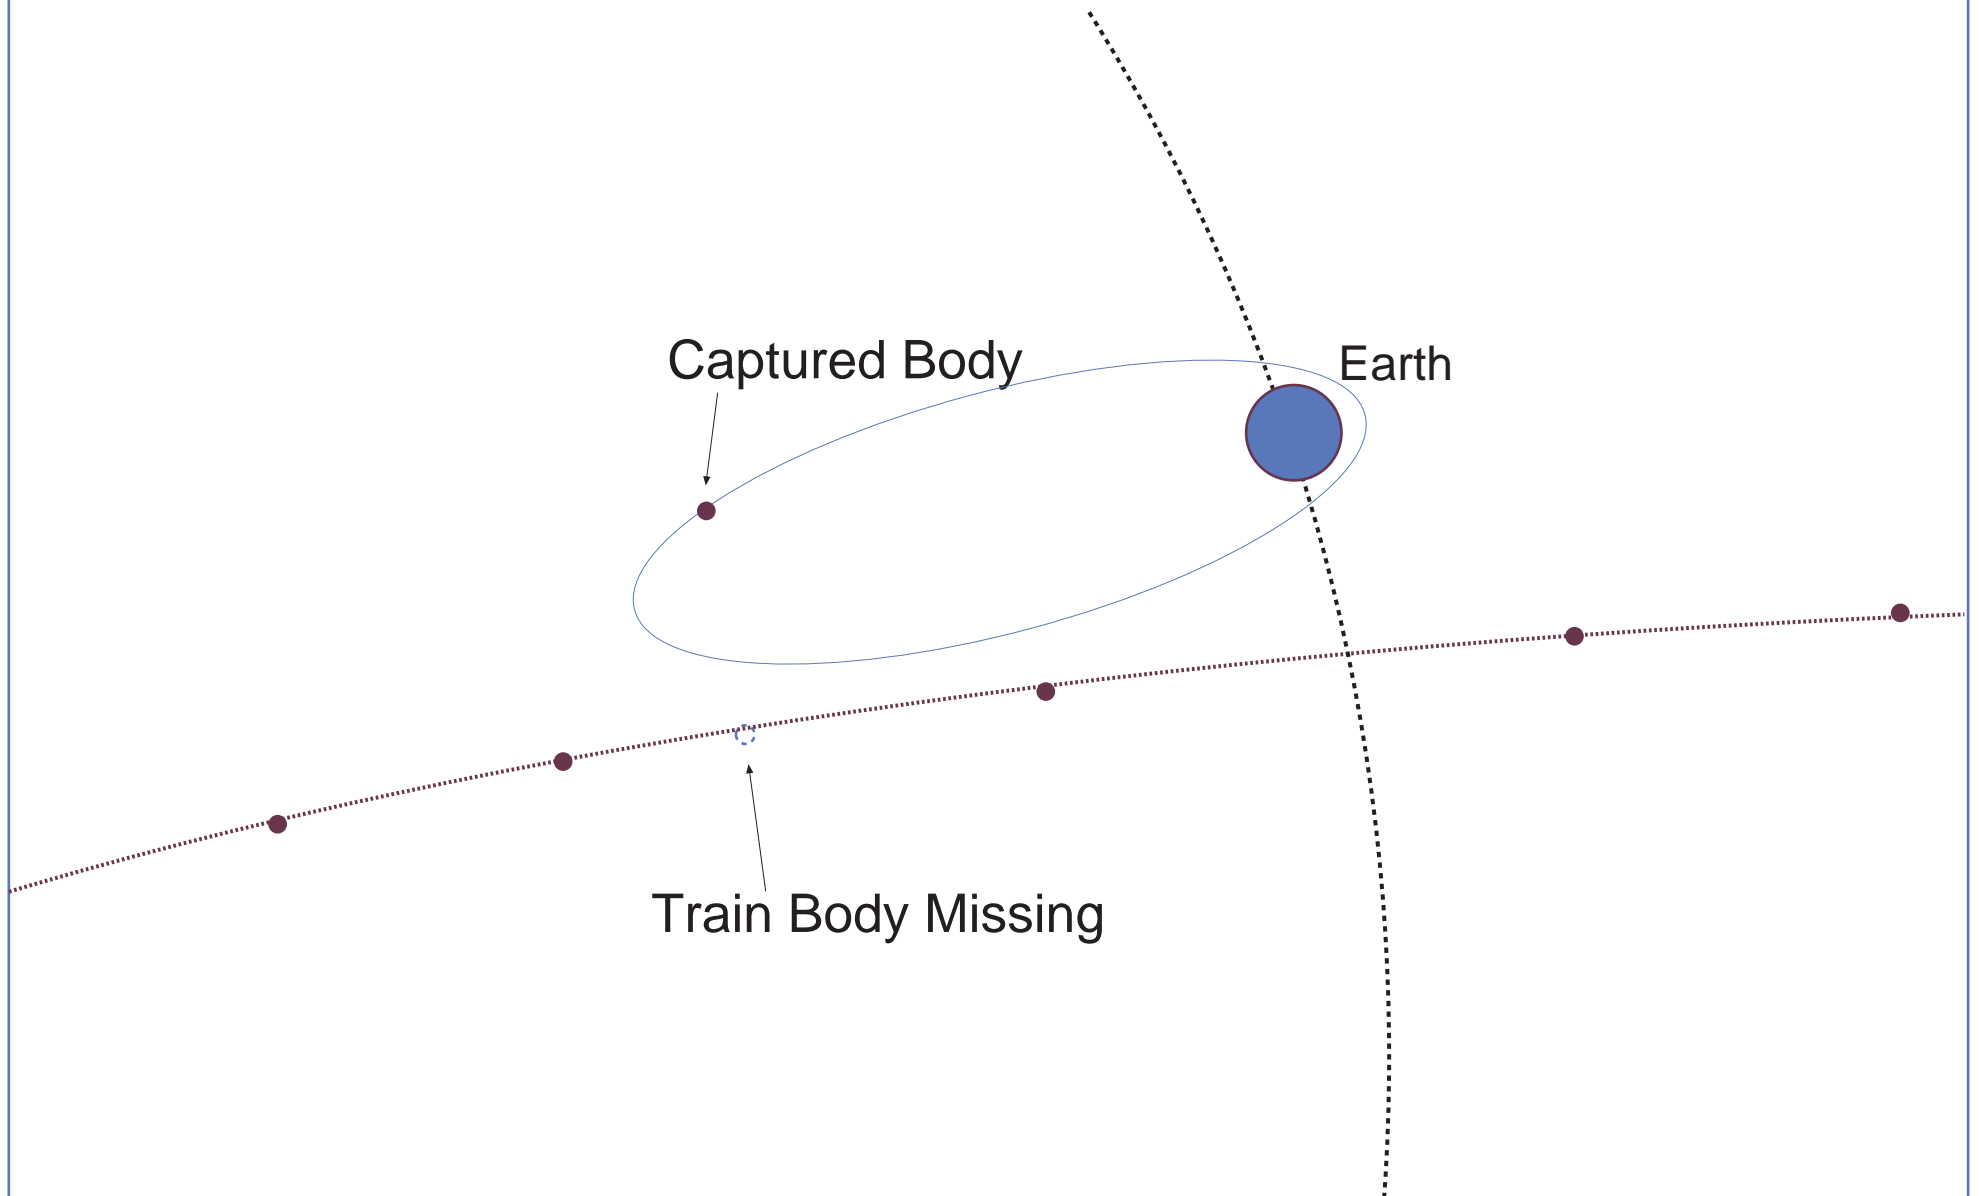

Reference <http://star.arm.ac.uk/~aac/zetataur.html>

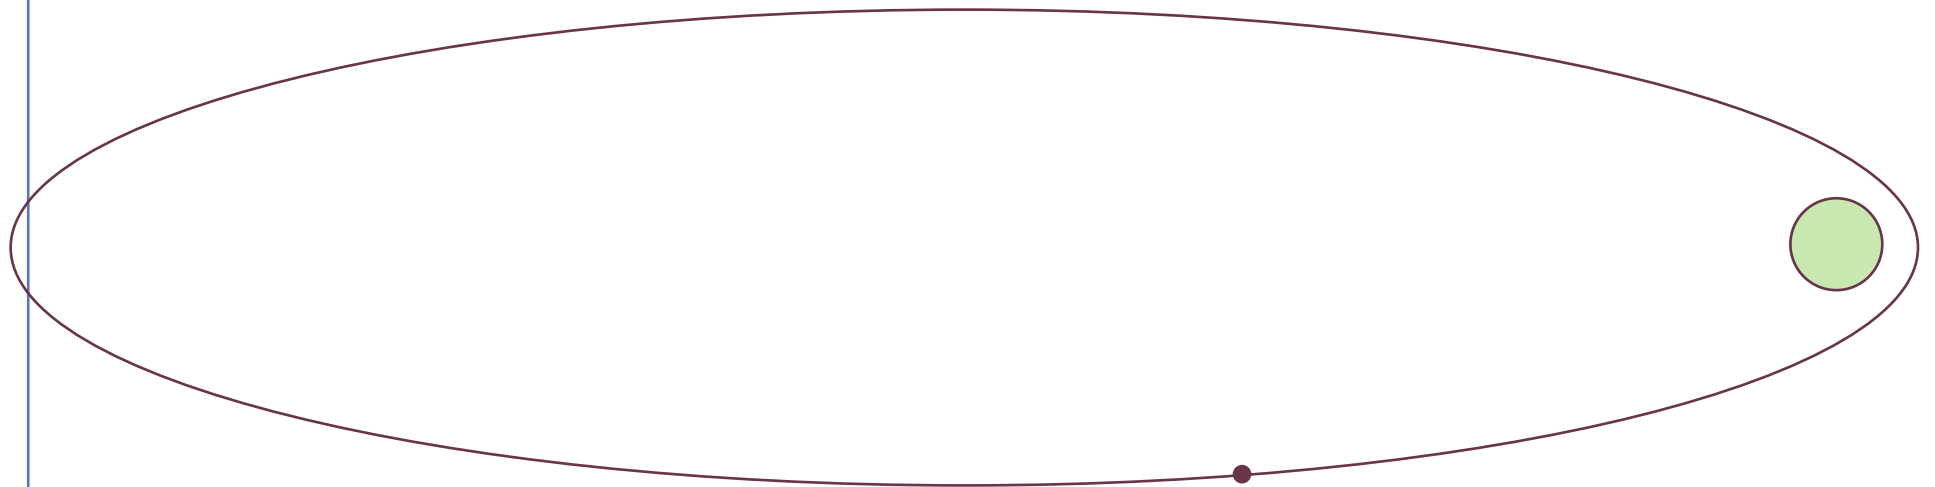

Earth's Orbit Intersects Comet Train

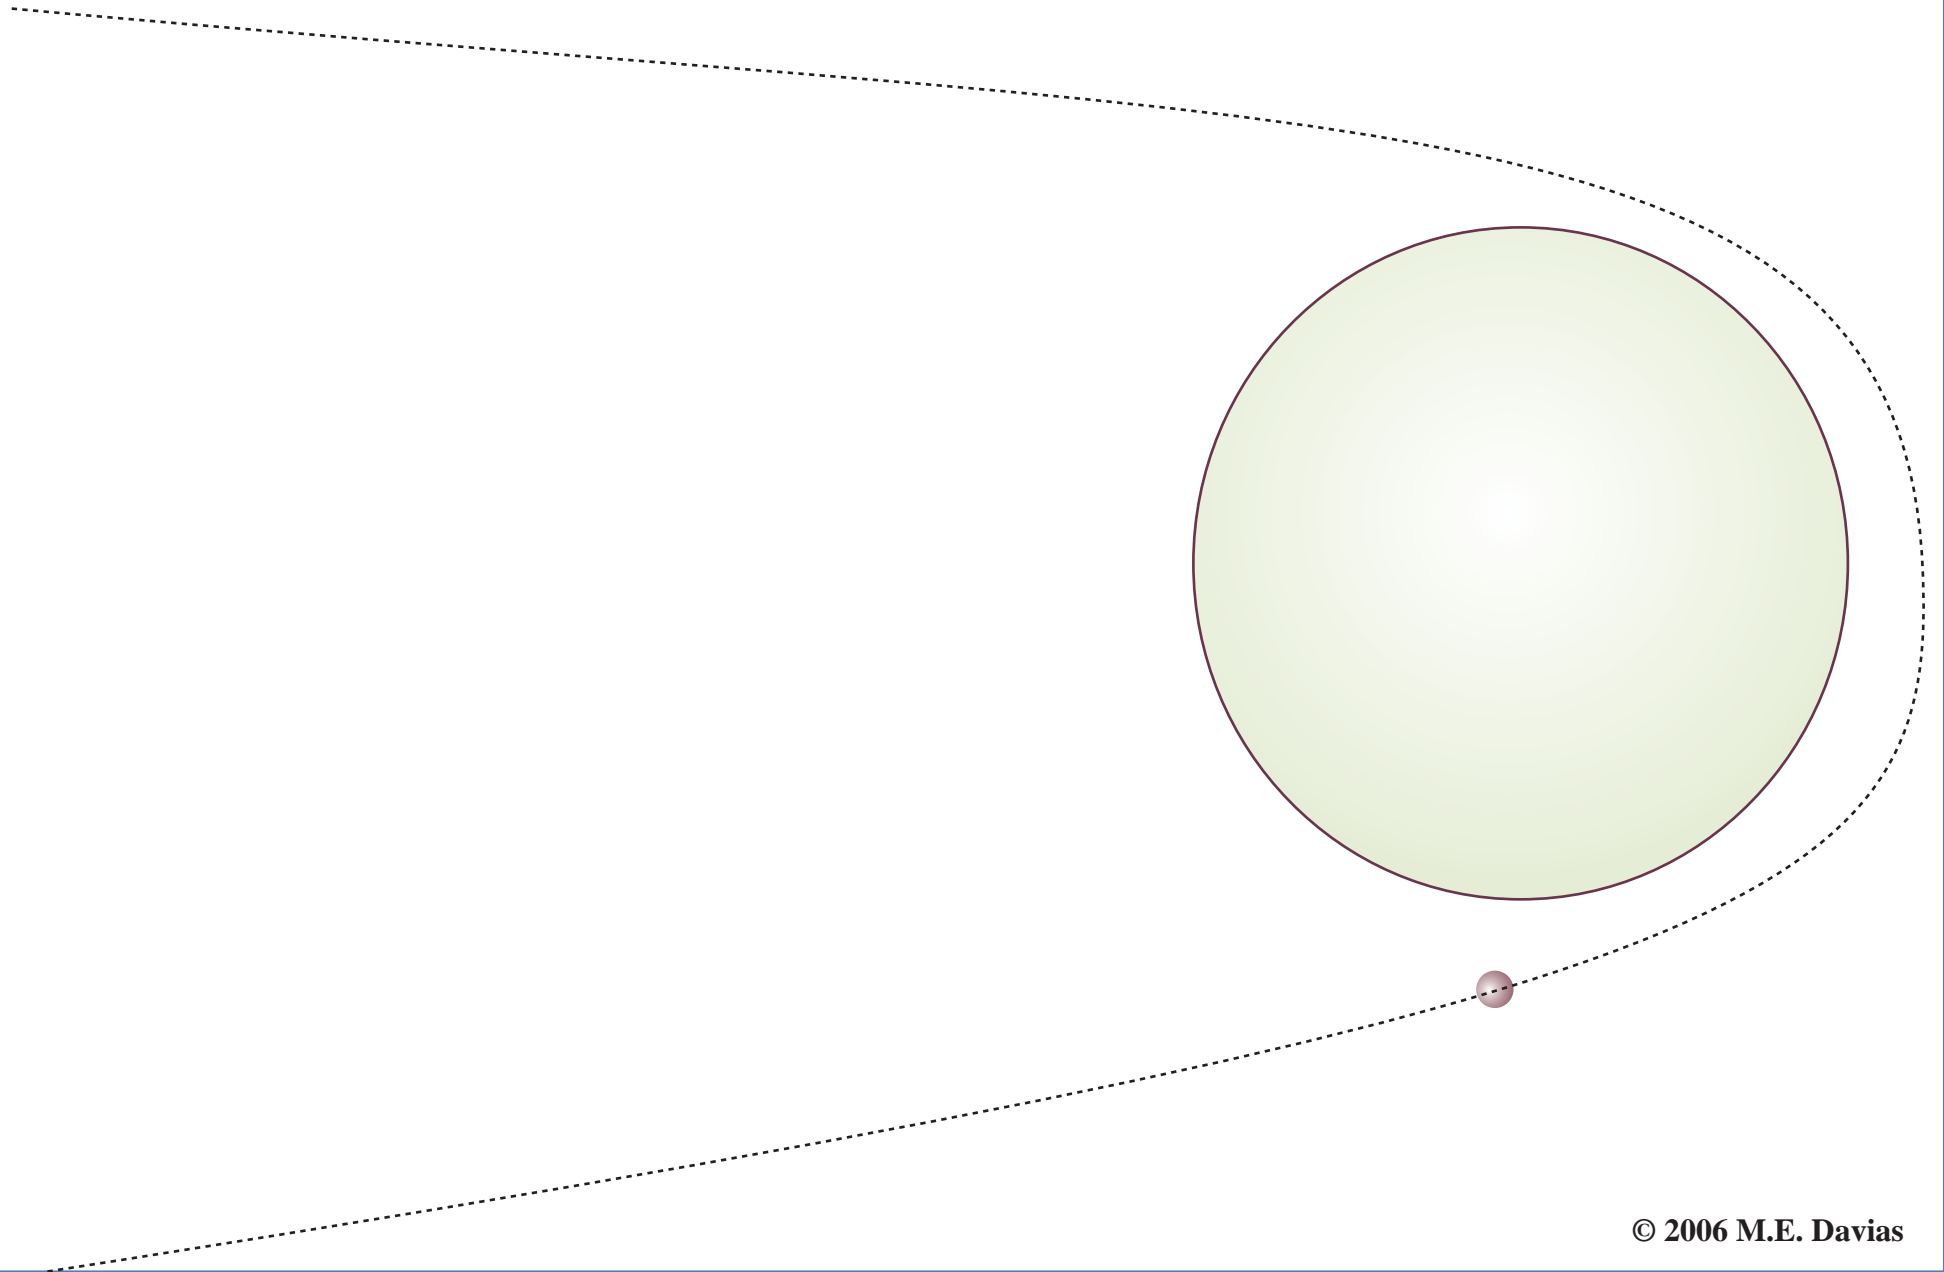

Earth's Gravity Captures Fragment

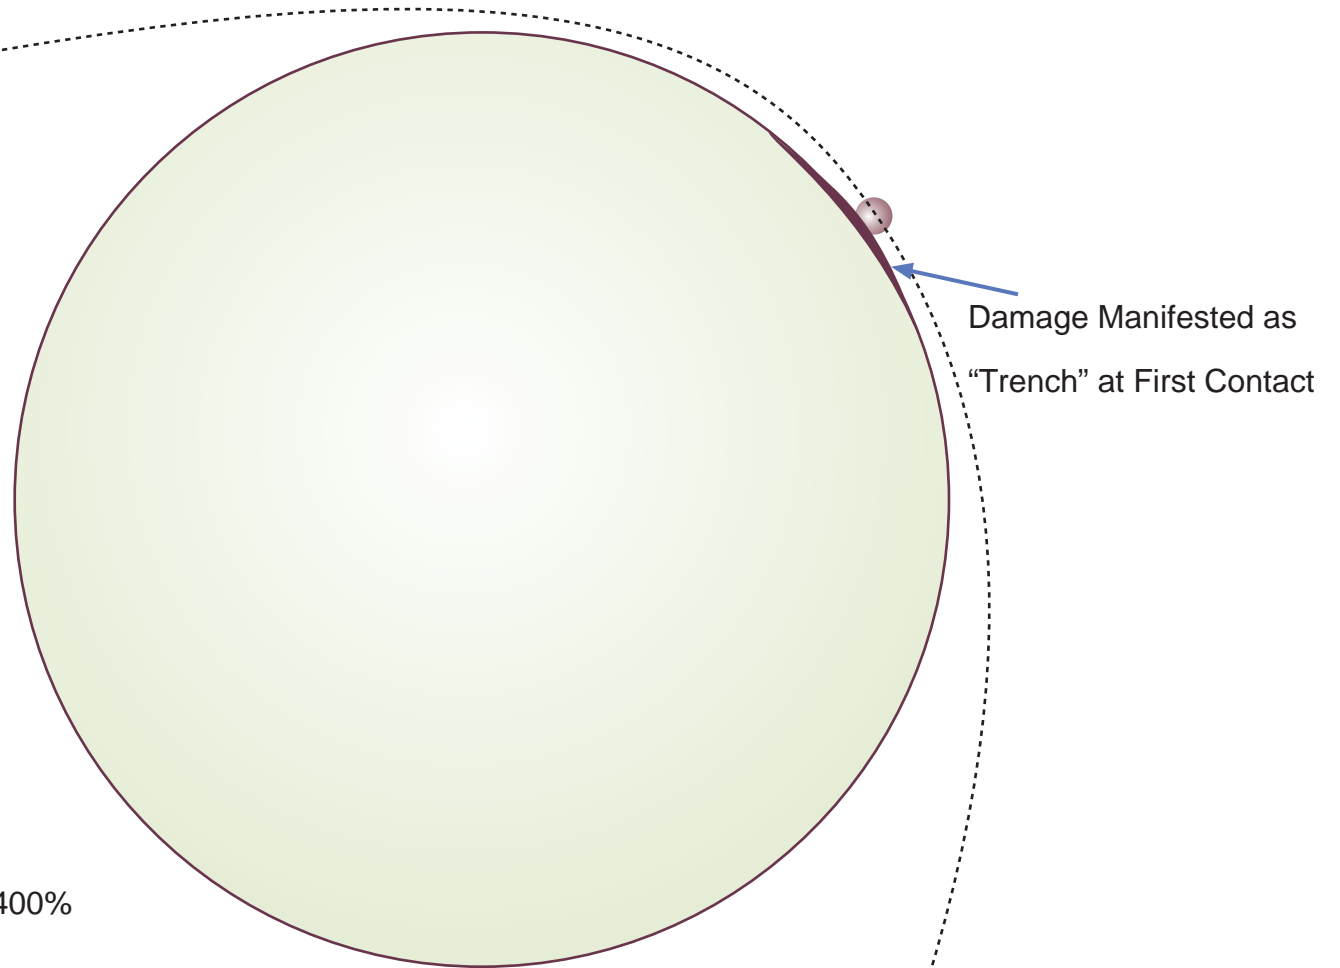

Captured Comet in Elliptical Earth Orbit

Captured Comet in Decaying Earth Orbit

Impact at Perigee After Orbit Decay

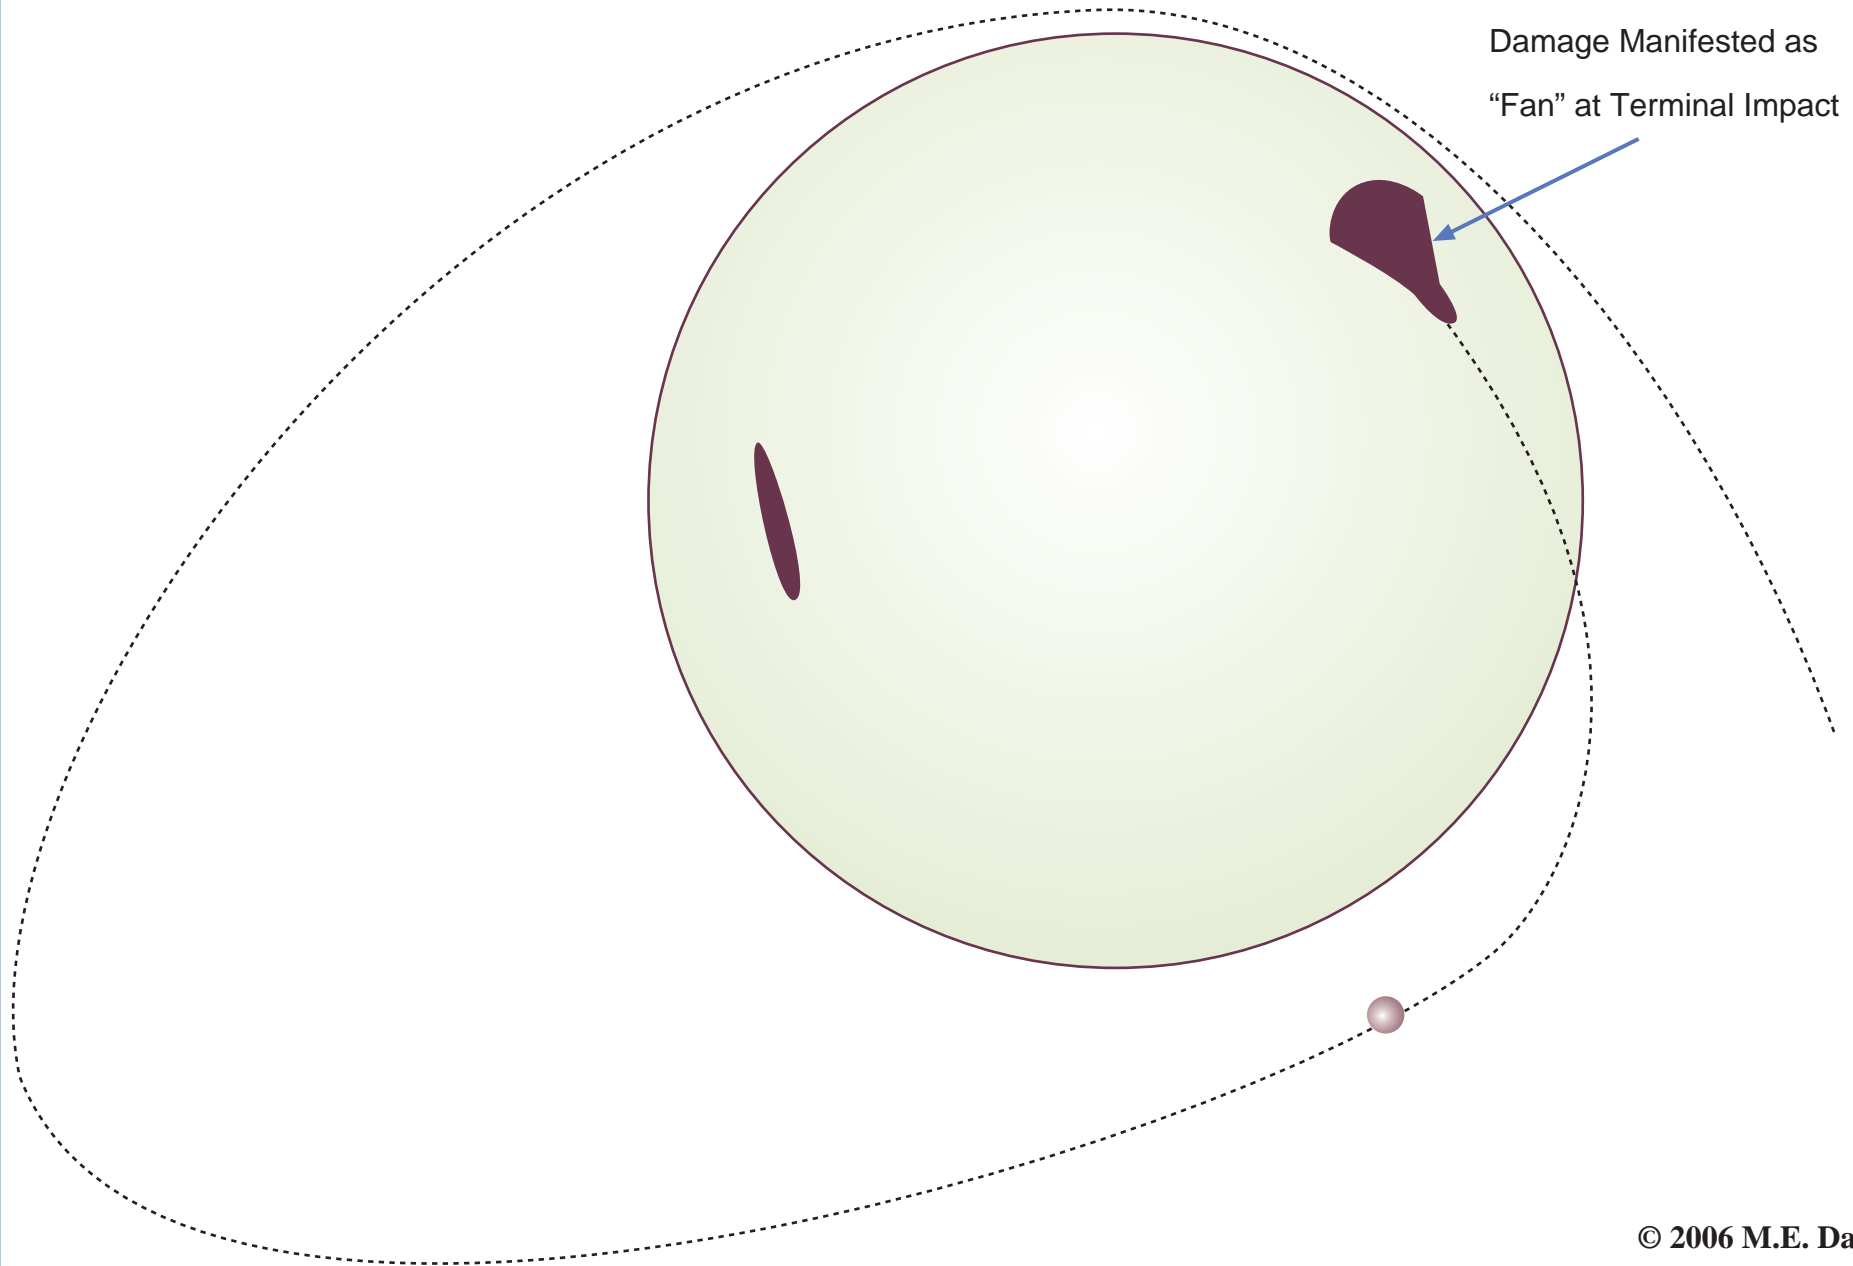

100 km impactor Exaggerated 400%

12,800 km target

Ratio ~ 1%

On Next Orbit the Perigee Impact Is Terminal

Case With Earth-Disrupted Multiple Bodies
